

Bucket type Filling System

Bucket type filling Systems are meant to meet specific industry requirement to elevate for processing or packaging. These systems require comparatively less floor space and can elevate to grater heights. Our Bucket type filling systems are non-scooping type. Food grade PP moulded buckets are used. Indigenously built, systems can be made available in varied heights. Easy to clean, Ergonomic design, Rugged construction. AC single phase motors with gear box are being used as drives. Can be integrated to sensing devices at the output.
